Dear Homeowner,

Several years ago the Holmes Approved Home program was test piloted in Calgary, Alberta by researching and finding five of the best builders in the city. At that same time we interviewed and looked into a variety of Trades who worked with that initial builder group including plumbers, electricians, framers and insulators to find the best Trades in the city. From those early days the program has expanded across the country to include over 45 builders.

One company that always stood out for us in our initial Calgary research was Byron's Plumbing and they have been involved with the Holmes Approved Homes program ever since. They even helped build the first Holmes Approved Homes in all of Calgary.

Byron's Plumbing is a company with a strong work ethic, solid ethical standards, up-to-date technical knowledge and a company who Makes It Right™ and stands behind their work.

We would gladly recommend any homeowner to hire Byron's Plumbing for any of their plumbing needs and be assured that the job will be done properly, with quality.

Good luck with your home project!

Seth Atkins
