To Whom It May Concern:

Mike Holmes Inspections recently booked Wayne McNeely for a training seminar held in Calgary for Approved Mike Holmes Inspectors operating in British Columbia, Alberta, and Saskatchewan..

During the seminar, Wayne covered a wide range of plumbing topics, including potential plumbing issues in homes, how to identify deficiencies during a home inspection, plumbing codes, industry-related updates, new product innovations, equipment and protocols.

Wayne impressed everyone who attended the seminar. His in-depth knowledge and ability to explain detailed, and sometimes complicated plumbing issues with simplicity and clarity was especially beneficial for our home inspectors and the quality of service they provide. Following his talk he led a Q&A where he was also able to mitigate and troubleshoot various questions and concerns that will overall improve our home inspection services, documentation and reporting system.

Wayne did a fantastic job and we look forward to booking him again for future training seminars.

Regards,

A. Shojaie
